

Veinland GmbH and Nomatronics bundle their know-how,

On June 1, 2017, Veinland GmbH has taken over the entire product portfolio of Nomatronics in order to do so.

Nomatronics, headquartered in Greifswald/Germany, has been developing and manufacturing high-end products in the area of ship network technology for many years, according to the latest IEC standards.

Veinland GmbH, based in Neuseddin/Germany, has been internationally known for its hardware and software products for many years. From the NMEA Splitter over DVI KVM switches up to complete ship efficiency solutions, the company enjoys ever-increasing product demands since the last years. Veinland develops and manufactures with a very high production depth at the Neuseddin site, which has been massively expanded in recent years.

Effective June 1, 2017, Veinland GmbH takes over the Greifswald location and the entire product portfolio of Nomatronics.

Mr. Linke, founder of Nomatronics and developer of the products, will take over the responsibilities for the many existing products and new developments at Veinland GmbH as Head of Hardware Development.

The "new" Veinland team is looking forward to being a reliable, innovative partner for its national and international customers.

Nomatronics would like to thank all the partners for the successful cooperation and is looking forward to many new joint projects under the umbrella of Veinland GmbH.
