

# ISES ASSOCIATION

## ABOUT US

International Ship Engineering Service (ISES) Association, has been providing high quality services since 1963 to hundreds of satisfied ship owners worldwide. The Association was set up by leading marine service suppliers to form an alternative, independent, high quality service network and today counts over 50 members. Services include electrical, electronic and mechanical repairs and supplies in the over 150 ports covered by ISES members.

Since the network is independent of manufacturer service networks, no preference to any brand is given when handling service requests.

Ship Owners throughout the world have come to rely on the quality of service and resourcefulness of the ISES network. From underwater hull repairs to radar scanners, anchors to propellers, an ISES Member will be able to assist you regardless of the project size or complexity.

Service throughout the world in the Marine Electrical, Electronic, Engineering and other Technical sectors.

## Worldwide Quality Maritime Service Network

### ► Single Point of Contact

For electrical, electronic and mechanical services and supplies, reducing and simplifying superintendents workloads.

### ► Extensive global coverage

In over 150 ports, including many ports not covered by other service networks.

### ► Manufacturer independent network

Resulting in more competitive rates and attractive discounts.

### ► Product expertise

Not limited to a single brand.

### ► Global coordination among members

Ensuring adequate follow up port-to-port.

### ► Turnkey solutions
